

ShredAssured Destroys More Than Paper!!

Don't just store your obsolete IT Equipment or E-Data in a closet. Using specialized equipment, **ShredAssured** can destroy it all, rendering any data or information un-retrievable. We then separate the resulting material so that it can be recycled into future products. Destruction can be on-site at your location, or the materials may be collected using our fleet of secure trucks, then completely destroyed at our warehouse. A drop-off service is also available.

Clients receive a signed Certificate of Destruction for all materials destroyed.
